License

The excellent preparation of our fields has allowed, since early twentieth century, the practice of this sport in optimal conditions. In this context, we have created a significant amount of teams that have won the top prizes in the world.

The Pole, known as "The sport of princes", has reached in Argentina its best expression. Here, it acquired its roots and has become an elite sport, spreading itself to the rest of the world.

In our country, the genetically adapted horse raising for this sport got the highest levels of purity. Because of this, we propose to develop a trademark concept with the same level and the same force, oriented to an elitist public ABC1; this group aims to belong to a class that highlights the style and excellence associated with the "Sport of Princes".

Our promise is to provide an elite brand: prestigious, elegant, refined, and of a high quality.

Our industries and importers, in Argentina, in the East and in the whole planet, are able to produce world-class products with an excellent cost-benefit relationship, generating businesses with the maximum ROI (return of investment).
